GREETINGS

It is a pleasure to send you our 1948 list of Gladiolus. You will find the best of the present day glads listed. As you review this catalog you will notice a rather large list of newer glads. This is due to our effort to make available to you the best of both the old and the new. Price is not necessarily a criterion of how good a glad may be; it usually indicates the amount of stock in existence. The greater the stock the lower the price.

Your orders will receive our personal attention, and we will do everything in our power to see that you receive the utmost value for your investment. All our stock is hand dug, cleaned and graded.

BUSINESS TERMS

Minimum orders, \$2. All retail orders are prepaid. Wholesale orders are shipped via express, F.O.B. Owosso, Mich. If you live where you do not have free express delivery service, notify us at time of order and advise how to ship. Remittance may be made by check or money order either to me or my father, **James E. Arnett, 622 Queen St., Owosso.** Your order will receive the same Golden Rule treatment from either of us. Our bulbs are state inspected which assures you of clean, healthy stock. Please do not ask us to split a unit. Where a unit reads 3 for .25 don't order less than 3 bulbs. No single item can be filled for less than .25.

Your order will be acknowledged as soon as received. Bulbs will be shipped as near to date requested as possible. Because of our severe weather, it is best to ship bulbs after the middle of March.

ORDER BULBS EARLY—Your choice of a variety may be of limited stock. Orders will be filled in order of dates received. Please indicate on your order if we may substitute size of bulb giving equal value. It will help if you will indicate a second choice either in size of bulb or another variety. **Full cultural directions will accompany your order.**

BULB SIZES—Large size is 1 1/4 inch and up, medium size 3/4 to 1 1/4, small size 1/4 to 3/4.

BULBLETS of some varieties are hard to germinate. You will find what we consider to be the best method of growing bulblets in the cultural directions.

GUARANTEE—It is our intention to send out only healthy, true to name bulbs, and we will gladly refund the purchase price if the bulbs are found unsatisfactory upon receipt. We cannot, however, guarantee results as planting and your storage conditions are beyond our control.

DISCOUNT—On cash orders of \$3 to \$5 you can select 10 per cent extra in bulbs of your own choosing. From \$5 to \$10 select 15 per cent, all over \$10 select 20 per cent. In addition all orders will receive over-count and extras. Discounts do NOT apply to special collections nor wholesale orders.

WHITE CHALLENGE

(Arnett—1947)

In describing this beautiful glad we base its merits on the comments of other experienced growers as well as our own results. For instance, David H. Jenkins of Davenport, Iowa, writes, "White Challenge proved to be a Wonder Glad for me this season. In my 35 years of growing, its beauty exceeded that of all the best that I have grown. It has also proven to be a heavy propagator."

We also received this communication from that wonderfully sweet and kind lady hybridist, Mrs. George Kinyon of Gladwin, Michigan. "The spike from the one large bulb (White Challenge) was wonderful. We cut it when the first bud opened. There were 22 . . . The spike lasted nearly three weeks before the last blooms were gone. It deserves all the honors given it." Thank you, Mrs. Kinyon and Mr. Jenkins.

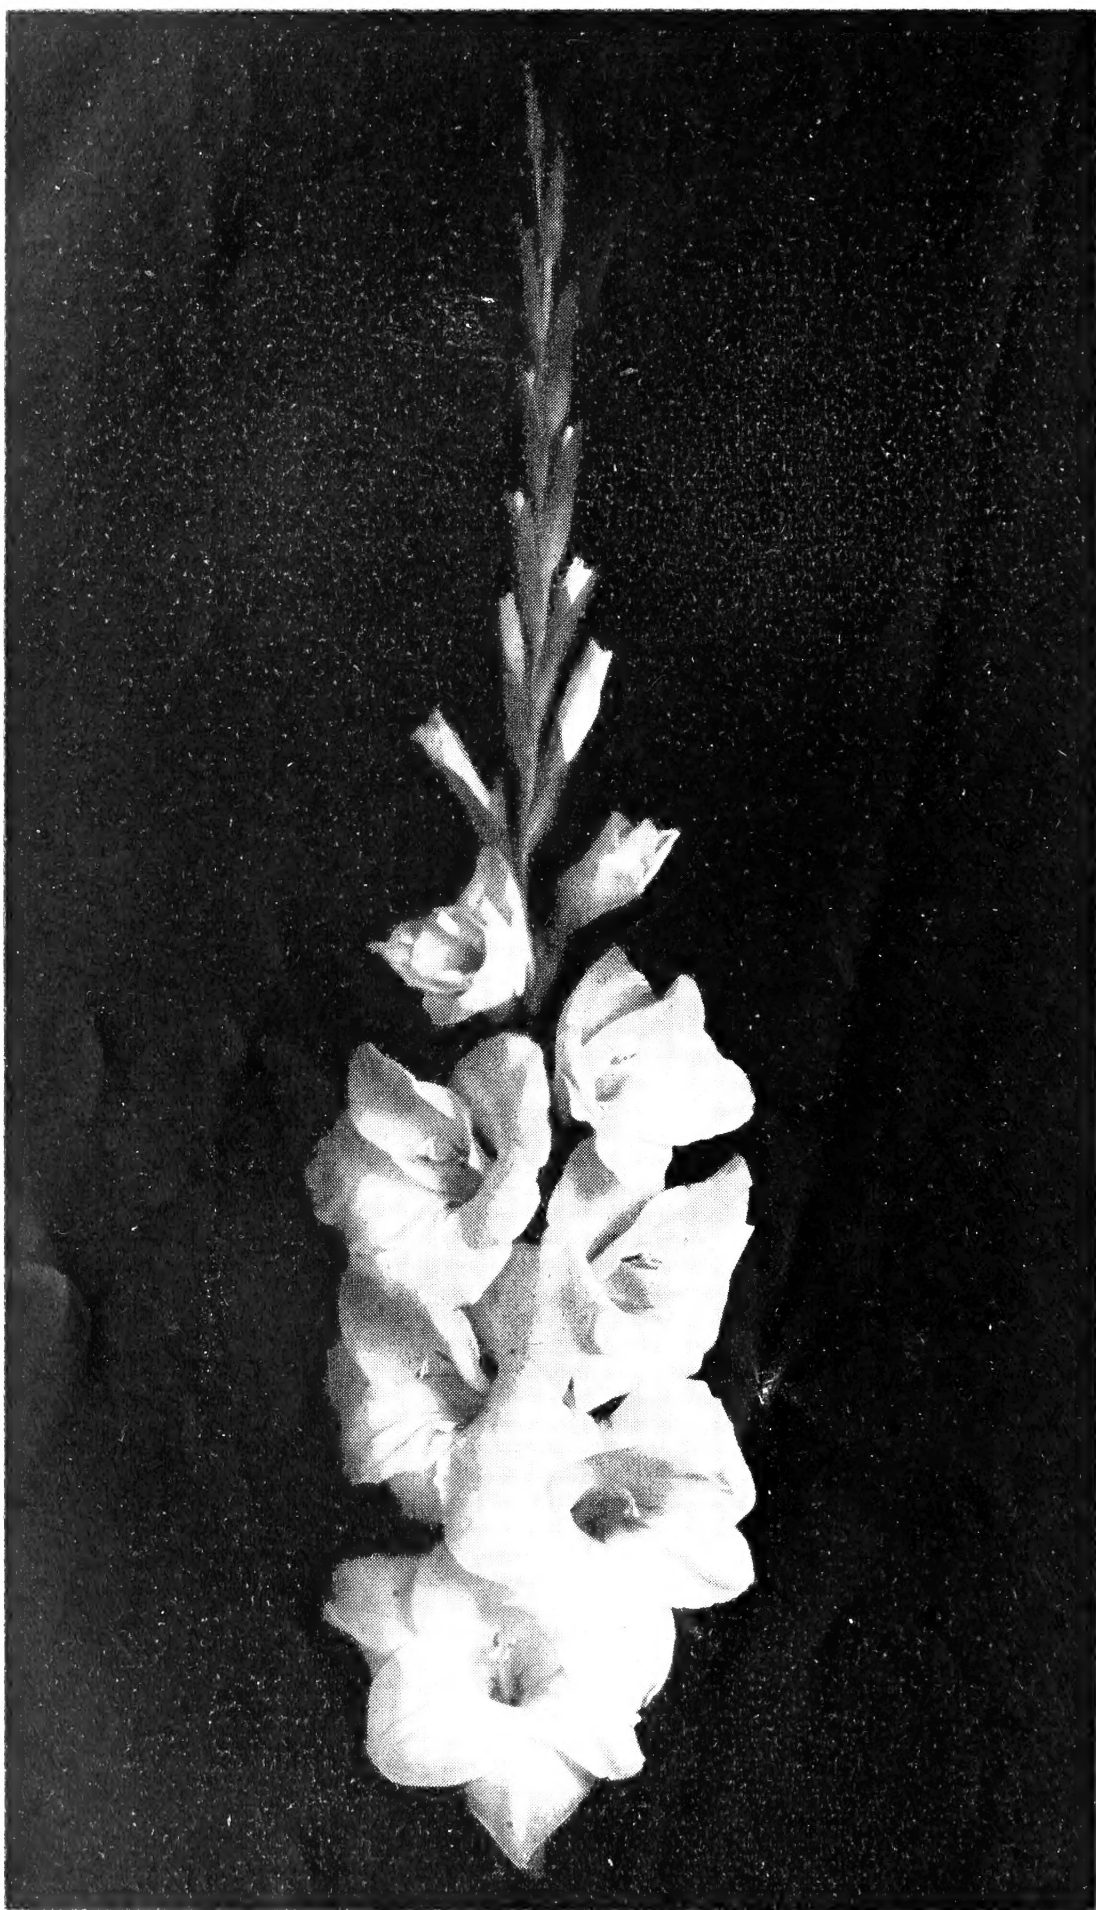

Facts about **White Challenge**:

- 1—It is a heavy textured white with a very light rose pink blush, and a pleasing rose throat.
- 2—Florets are 5½ inches across.
- 3—Spike has 22 buds, 8 open (has had 12) and 8 buds showing color. 30-inch flower-head.
- 4—Foliage is healthy and vigorous.
- 5—It is a constant performer, producing well in dry or wet seasons, in sand or clay.
- 6—White Challenge is definitely the florists' dream. It is totally different and has that unexplainable beauty that makes florists want all they can get. You should see a basket of White Challenge.
- 7—Here are some of its attainments in 1947 under ordinary field conditions with a limited number of bulbs.
 - a—Grand Champion of 3 glad shows.
 - b—Runner-up for G. C. at a fourth show.
 - c—Best recent introduction at 4 shows.
 - d—Best 3 spike entry at one show.
 - e—Longest flower-head at one show. We had one spike with a 40-inch flower head.
 - f—It won 16 blue ribbons in Michigan shows alone.
 - g—It received the highest score given at the Michigan Trial Garden. Score 85 and an award of merit.

These attainments give an indication what shows in other parts of the country can expect as soon as stocks are available.

Retail Prices—\$5 any size bulb; bulblets 50c each. 10 for \$5; 100 bts. for \$40.

Folks, if you ever get near northern Michigan be sure to drive to Mrs. Kinyon's home 10½ miles east of Gladwin. You will see lovely gladiolus in a lovely garden and meet a lovely woman.
